SA 30 BIKE

Bike, Scooter, Go-Kart & Quad, Tyre Changer

Code:

Semi-automatic tyre changer designed to operate on motorcycle, go-kart, gardening machines, scooters, quads and wheels of important dimensions. Its slender line makes it easy to handle but the structure has been designed to work on tyres with larger widths so it is very robust. SA30B is the ideal tyre changer both for workshops and for use on vans and race fields. Thanks to the traditional stall system, with specific blade for motorcycles, it adapts well to any type of tire. The self-centering plate, thanks to the new system of sleds and jaws, allows you to quickly and easily tighten wheels from 4" to 26".
