

CAR / TRUCK > CAR / TRUCK - STARTERS EMERGENCY (I-STARTER)

**STARTER BOS1224-M**Code: **MAA02XXXX0041**

The BOS1224-M model delivers 1380CA at 24V and is suitable for the medium-heavy use of the electrician, the industrial bodywork and the rescue fleet, on cars and vans of any displacement and on industrial vehicles with batteries that are not completely discharged, under normal conditions of temperature. The Powerbox 12 / 24V portable emergency starters are distinguished by their high power that can satisfy the most demanding needs of professionals. Made without compromise to get the maximum reliability and durability, they use only high quality components. PE case guaranteed for life, fuse protected AGM battery, super flexible Radaflex cables, precise and easy to read voltmeter to check the status of the alternator. The GAS-FREE system available on the M and XL models definitely solves the problem of hydrogen emission in the event of incorrect voltage selection, present in every double voltage starter. The calipers are specific for starting, completely isolated and equipped with LED light for night use.
