

CAR / TRUCK > AUTO / AUTOCARRO - LIFTERS

**LIFT BOTTLE 8 TON**Code: **MOF01XXXI0025**

The hydraulic bottle lifters are used in all situations that require a great pushing force in small spaces. They can replace the supplied emergency lifter, especially on heavy off-road vehicles. They are also used for lifting and leveling construction machinery and cranes, and can also work horizontally as a pushing and positioning tool. The safety valve prevents any overload, and the high quality heat treatments ensure constant professional use over time.
