**CTEK MXT14 CHARGER 24V-14A**Code: **MAA02XXXX0098**

CTEK MXT 14 is a powerful 24V battery charger, capable of delivering 14A to recharge battery banks up to 300Ah, and to keep banks charged up to 500Ah. Ideal for industrial vehicle workshops, to provide for a recharge of their batteries during stops for coupons or small maintenance. The Recond program, if performed properly, helps the pair of batteries to find the right balance and ensures their best performance. Extremely easy to use, it also has the Power supply function for replacing the batteries without losing the memories or for keeping the voltage stable during ECU reprogramming and software updates.
