SMONTAGOMME S75

Code: **ASM01XSXX0201**

Automatic tyre changer of innovative design, specifically designed for professionals in the sector, suitable for the disassembly and assembly of wheels of passenger cars and light commercial vehicles. Without adjustments or adapters, it can lock rims from 10" to 24". Its particular sturdiness and reliability, obtained thanks to the adoption of patented technical solutions, The low ground height and double effect bead breaker cylinder make the S70 ideal for operating on particularly difficult and low-profile tyres such as runflats. Plastic protections are supplied as standard for all the elements, such as jaws, lever, bead paddle and turret, which could cause damage to the rim and, as an option, a wide range of professional tools and accessories to further facilitate the work of the operator and, consequently, improve its efficiency. Versions are available with the inflating device for tubeless tyres (t.i), with double rotation speed of the self-centering selectable via pedal (2v) and with pneumatic vertical arm (P) or manual movement.
