**PONTE SOLLEVATORE SMEQ 234**Code: **ASO05XSXA0002**

Electro-hydraulic lift with scissor movement, to lift, up to a maximum height of 1200 mm, scooters, motorcycles, gardening machines and citycar with a maximum weight of 600 kg. Descent at variable speed in the last stretch for better control of the raised vehicle. Large-capacity worktop with retaining ribs. Lifting platform with retractable hatch for wheel replacement. Retractable ramp for a smaller footprint in the raised work area. Manual clamp can be positioned in different points on the lifting platform. Front wheel stop. Electro-hydraulic control unit with man-operated controls. Additional air intake. Shock absorbing limit switch. Safety device with mechanical coupling that prevents uncontrolled descent of the bridge in case of failure in the pneumatic system. Parachute valve that intervenes in case of breakage of a hydraulic pipe avoiding the descent of the bridge.
